

Conflict Mineral Certification

The Dodd-Frank Wall Street Reform and Consumer Protection Act imposes the US Security and Exchange Commission (SEC) reporting requirements on US companies whose products contain metals derived from minerals defined as “conflict minerals”. The report shall identify the products that contain conflict minerals, the country of origin of the conflict minerals, and whether the conflict minerals came from “covered countries”.

“Conflict Minerals” are defined as Tantalum, Tin, Tungsten and Gold ; and “covered countries” are the Democratic Republic of Congo (DRC), Angola, Burundi, Central African Republic, Rwanda, Tanzania, South Sudan, Uganda, and Zambia.

The new reporting requirements are based on concerns that revenues obtained from mining and transport of conflict minerals finance the ongoing conflict in the Democratic Republic of Congo (DRC) and surrounding countries, and the resulting humanitarian crisis.
